Reading

9 Read the article about high-tech dining. Six sentences have been removed from the article. Choose the best sentences (A–H) to complete the article. There are two extra sentences.

High-tech dining

Americans love going out for dinner. In fact the average American family now spends more on going out to eat than it does on groceries. (1) We choose restaurants according to the atmosphere, the type of food, the service and, of course, our budget. Soon there may be another factor that helps us choose a restaurant, and that is technology. We know that high technology is already involved in food preparation and chefs have a wide range of kitchen gadgets to make better dishes, more efficiently. We shall soon be discovering that technology has an importance in the actual dining experience itself. (2) These will probably become quite normal in the future.

In just a few years, paper menus may well be a thing of the past. We'll be using the table top as a computer screen, and pictures of the different meals available will appear on our empty plates for us to choose from.

(3) We'll be communicating directly with the kitchen and there will be no need for waiters to take our orders. This will reduce the time we have to wait and also reduce the possibility of human error when taking orders. (4)

Technology like this will be good for restaurants that need diners to eat quickly and move on, allowing other people to take their places. It's easy to see why – because they'll make more money! (5) Getting the correct meal quickly is important, but surely this introduction of high-tech ordering will mean that many waiters will lose their jobs. One restaurant in Germany has already got rid of the need for any waiters at all by putting in a mini roller coaster which delivers meals directly from the kitchen! Another point to consider is that s people don't always want to rush when they go out to eat. Diners want to take their time and enjoy the interaction with waiters.

(6) And whether we see interactive dining as adventurous and fun or a sad end to a great tradition, it is something that we shall all just have to accept.

- | | |
|---|--|
| <p>A Nowadays, computer-aided cookery is becoming more popular in restaurants.</p> <p>B We'll also be able to order directly from our tables, tapping in codes on virtual keyboards.</p> <p>C However, is this necessarily going to be a good thing?</p> <p>D As we have seen, technology is already changing the way that some restaurants operate and experts believe that most of them will have changed dramatically by about 2020.</p> <p>E How many times have you got the wrong meal because the busy waiter either didn't write down your order or wrote it down incorrectly?</p> | <p>F Whether it's a pizza at the local Italian restaurant or fine dining at a top hotel, we all love the experience of going out to eat.</p> <p>G Some restaurants have already understood the need for this and have introduced some amazing new ideas.</p> <p>H Another disadvantage is that the computer system may break down and this would cause endless problems for both customers and the restaurant owner.</p> |

Speaking

16 Role-play the situation with your partner.

You and your friend want to go out to dinner in your town. Look at the list of restaurants and make brief notes on the advantages and disadvantages of each one.

- Nachos Nachos:* A new Mexican restaurant. Hot spicy food with a difference. Colourful décor.
- Burger Delight:* The biggest burgers in town. Hollywood theme.
- Noodle city:* Noodles, noodles and much more. Crispy vegetables, tangy sauces, noodles galore.
- Fruit heaven:* Delicious fruit smoothies, fruit kebabs, passion fruit, berries and much, much more.

Now work with your partner to decide which restaurant to go to.
